

Instructions on uploading Photo to Stack Sports:

1. Click the upload arrow button

2. Click the Upload button to open a file off your hard drive. Or Drag the photo from your desktop to the "Drag a photo here" spot.

3. If your file is too large or small in pixel size the photo will not upload. Resizing instructions can be found at the end of this process.
4. If your photo needs to be rotated click the Rotate Left or Rotate Right button till photo is up right.

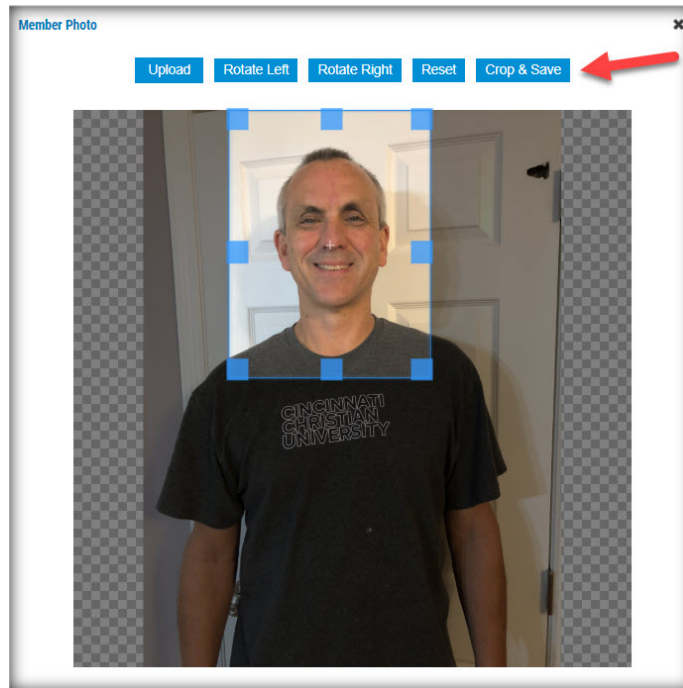

5. Click and hold a blue box to make the photo area smaller. You only want the head and shoulders in the photo box.

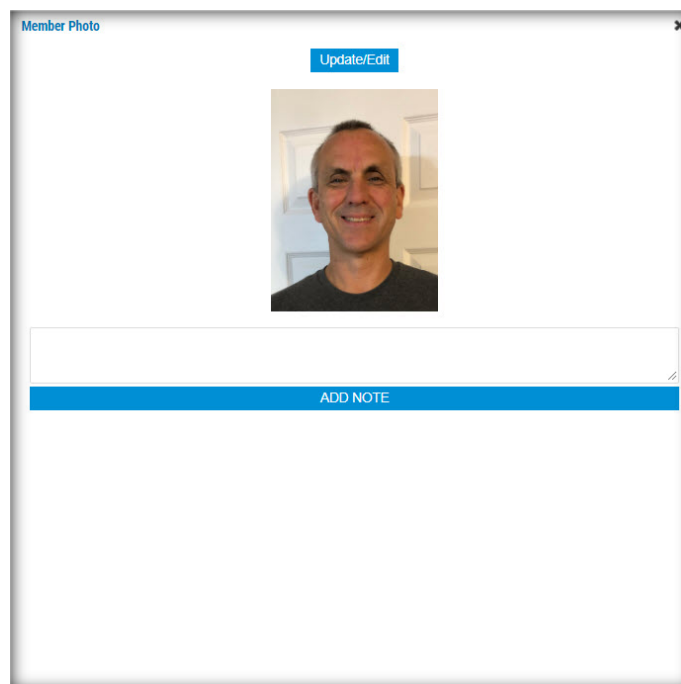

6. Click on the center of the photo box to center it over the persons face.

- Once photo box is in the correct spot, click the “Crop & Save” button. Make sure your file saves and you get the proper message confirming such.

- If you don't like the way the photo ended up, you can click the Update/Edit button. At that point you can try to fix the photo or upload the photo again and start over.

9. Be sure your picture looks right by clicking the magnify glass to preview it

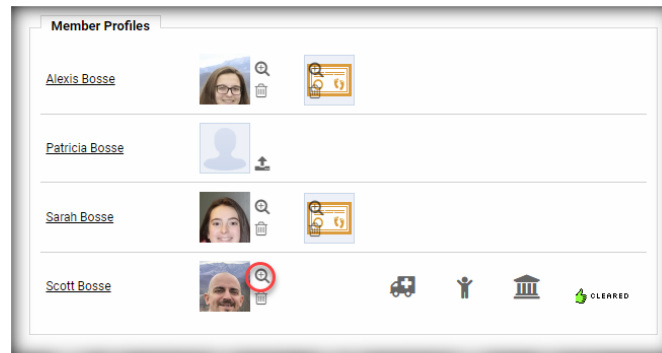

Photo now there, click magnifine glass to preview.

Instructions on resizing your photo:

If your photo saves and is sideways, or if you can't rotate the photo to the upright position, your photo is too small or too big. You will need to resize it.

One way to resize your photo is pic resize which you can find at <http://picsize.com>.

If you have Paint on your computer, you can use it... open the photo in Paint.

Click Resize if it is very large like this photo

Select percentage and input 25 in the horizontal box if by percentage or Select 300 if by pixels.

Save the photo and try uploading it again. If it's still too big try resizing again.

If the photo is very small...you will need a new photo because resizing a small photo will make it blurry.
